EVENT SNAPSHOT

The [Canadian Donation and Transplantation Research Program](#) (CDTRP) in cooperation with the [Canadian Society of Transplantation](#) (CST), will host the 5th edition of the Patient, Family and Donor Research Forum dedicated to donation and transplantation research partners across Canada on June 13 & 14, 2024.

Learning outcomes are:

- Advance multi-disciplinary collaborations in donation and transplantation research, with a focus on innovative clinical trials.
- Support investigators, trainees, and PFD partners in understanding and embedding equity, diversity and inclusion principles in their patient engagement strategy and research methods.
- Enhance your understanding of cultural safety and employ effective patient engagement strategies tailored to underrepresented communities.

“CDTRP’s PFD Research Forum is where researchers, trainees, and patient, family, and donor partners come together to share best practices and innovative strategies for patient engagement.

While the Forum is about building capacity, it’s also about forging connections and igniting inspiration. We aim to demonstrate that when patients are actively engaged, research priorities become more relevant, outcomes become more impactful, and knowledge dissemination is amplified.”

- Manuel Escoto, CDTRP Director of Patient, Family, and Donor Partnerships

TWITTER

Join @CNTRP on June 13-14 for the 2024 Patient, Family, and Donor Research Forum. Learn about effective #PatientEngagement in #ClinicalTrials and #EDI from clinicians, researchers, patient partners and best-practices to develop meaningful, collaborative, long-term partnerships with patients and communities.

Free Registration: <https://bit.ly/3JHxI9I>

NEWSLETTER

Register for the Canadian Donation and Transplantation Research Program's 2024 Patient, Family, and Donor Research Forum!

CDTRP's virtual Forum will be hosted on June 13 and 14 and will focus on capacity building in patient engagement for researchers, patients, family and donor partners, and trainees.

The PFD Research Forum will focus on strengthening patient engagement in clinical trials and embedding equity, diversity, and inclusion principles and strategies in health research.

Learning outcomes:

- Advance multi-disciplinary collaborations in donation and transplantation research, with a focus on innovative clinical trials.
- Support investigators, trainees, and PFD partners in understanding and embedding equity, diversity and inclusion principles in their patient engagement strategy and research methods.
- Enhance understanding of cultural safety and employ effective patient engagement strategies tailored to underrepresented communities.
